Kolhapur, Maharashtra

OBJECTIVE

Computer Science Engineering student skilled in Python, Data Structures & Algorithms, Machine Learning, and Web Development. Experienced in building real-time applications using Flask, Django, OpenCV, and Firebase through projects and internship experience. Seeking a Software Engineer or Python Developer role to apply technical and problem-solving skills in real-world projects.

WORK EXPERIENCE

Machine Learning Intern — iGAP Technologies Pvt. Ltd.

June 2025 – July 2025

- Visualized 3+ datasets (10K+ rows) using Pandas, Matplotlib, and Seaborn to identify key trends for feature selection.
- Preprocessed 10K+ rows across 3+ datasets via EDA to optimize baseline model accuracy.
- Trained 5+ regression, classification, and clustering models, improving baseline accuracy by 15% through EDA-driven tuning.

PROJECTS

Drone-Based Smart Vaccination System with Robotic Arm

[Project Link](#)

Technologies: HTML, CSS, JavaScript, Python, MongoDB, SQL, OpenCV, MediaPipe

- Built a robust vaccination scheduling website and a real time tracking dashboard, reducing manual data entry by 80% for administrative staff.
- Achieved 90%+ identity verification accuracy using OpenCV's LBPH facial recognition algorithm.
- Automated deltoid region detection for 100% of sessions using MediaPipe BlazePose pose estimation.
- Automated identity verification, processing 15+ vaccination records per session with zero manual intervention.

KrishiSetu — Smart Agricultural Platform

[Project Link](#)

Technologies: HTML, CSS, JavaScript, Python, Flask, MongoDB, Flask-JWT-Extended, bcrypt

- Developed a full-stack agricultural marketplace using Flask and MongoDB, enabling farmers to list, manage, and sell crops and products online.
- Designed and integrated a MongoDB database with 4+ collections (users, crops, products, orders) using efficient CRUD operations, following a modular and scalable backend architecture.

KnowledgeShare — PDF Sharing Platform

[Project Link](#)

Technologies: HTML, CSS, JavaScript, Python, Flask, MongoDB, Flask-JWT-Extended, SQLite, Render

- Built a full-stack web platform using Python, Flask, MongoDB, and JavaScript that enables 100+ students to upload, share, search, and access academic PDF resources through a centralized repository.
- Integrated secure authentication mechanisms, employing Werkzeug password hashing and Flask-JWT-Extended, ensuring the protection of 100+ user accounts and their uploaded study materials.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript

Web Technologies: HTML, CSS, JavaScript

Frameworks & Libraries: Flask, Django, REST API, APIs, OpenCV, MediaPipe, NumPy, Pandas, Matplotlib, Seaborn

Databases: MySQL, SQL, MongoDB, Firebase

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Machine Learning, EDA, Model Evaluation

Tools & Version Control: Git, GitHub, VS Code, XAMPP

EDUCATION

B.Tech — Computer Science & Engineering — CGPA: 6.97

Graduation: 2027

Sharad Institute of Technology, College of Engineering (SITCOE), Yadrav

HSC (Class XII) — 56.83%

2022 – 2023

Shri Shankarrao Chavhan Vidyalay, Nanded, Maharashtra

SSC (Class X) — 78.40%

2020 – 2021

Shri Shankarrao Chavhan Vidyalay, Nanded, Maharashtra

ACHIEVEMENTS

- Registered design patent** for AI-Powered Intelligent Interview and Candidate Evaluation Device.
- Secured 1st Place** in Hack The Vibe (NexAura'26) by independently designing and deploying an AI-powered web application.
- Selected for DIPEX 2026 State-Level Project Exhibition for presenting an AI-based Smart Vaccination System.
- Solved 175+ LeetCode problems covering Arrays, Strings, Hashing, Linked Lists, and Sorting.

LANGUAGES

English, Hindi, Marathi
